

## Environmental Policy

We, the Management and the Employees of Mövenpick Resort & Spa Tala Bay Aqaba are committed to promoting, supporting and incorporating environmentally sustainable practices that responsibly sustains the environment, with an aim of reducing pollution and safeguarding the long-term existence of our businesses. We are committed to implementing sustainable initiatives that will have a long-lasting impact on our community, in the most efficient use of limited resources available.

Therefore, we subscribe to the following sustainability measures:

1. Complying with the requirements of environmental legislations.
2. Efficient use and consumption of water, energy and other resources with constant analyses and evaluation.
3. Active involvement in raising sustainability awareness for our employees, guests and community.
4. Safeguarding cultural and natural heritage by ensuring that all business activities are not negatively affecting protective areas and sites.
5. Prioritise use of eco-friendly products and chemical that are not aggressive to the environment.
6. Implementing and applying waste management and recycling program within the resort.
7. Modification of our purchasing policy to be in line with sustainability guidelines.
8. Continuously engaging in initiatives which improve our environmental and social performance.

Adhering to the above principles, we are committed in setting up objectives with defined targets that are reviewed constantly to improve our environmental and social performance while becoming environmentally competitive and a benchmark in the tourism sector.
